-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: in line 2 “end” should be pluralized. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 3 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by the UK Patent Application to Kao (GB 2105984A). Kao shows a pneumatic raft construction that comprises a series of interconnected cylindrical floats 20 which can be inflated to shape (page 1, line 77). Each float has a retaining ring 21 attached to its ends through which a connecting line or rope 30 can be passed to create a body formed by serially connected floats, as is shown in Figure 2. The rings can be formed as part of an end cap 24 that can be heat sealed to the ends of the floats (page 1, lines 85 to 89). A second embodiment is shown in Figures 9 and 10, in which the end cap is formed as a body 52 with a protuding button 53, with a pair of the end caps being attached to the ends of a float 50. The buttons 53 engage slots 61 formed within a belt 60 in order to serially connect a set of the floats together.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 , 7, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over the UK application to Kao. As noted above, Kao discloses that the float members of the raft are inflatable. However, no fill valve structure is shown or disclosed. It would have been within the ordinary level of skill in the art to provide a fill valve for the float members of the Kao raft, since this would allow the user of the device to refill the floats if so needed. Because of this it would have been obvious to the skilled artisan to have provided each of the Kao floats with a fill valve structure.

Allowable Subject Matter

Claims 4, 5, 8 to 10, 12, and 14 to 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Varga, Kirkpatrick et al, McClanahan, Marston, and Noerdinger show air filled mattresses and rafts that are of general interest.
